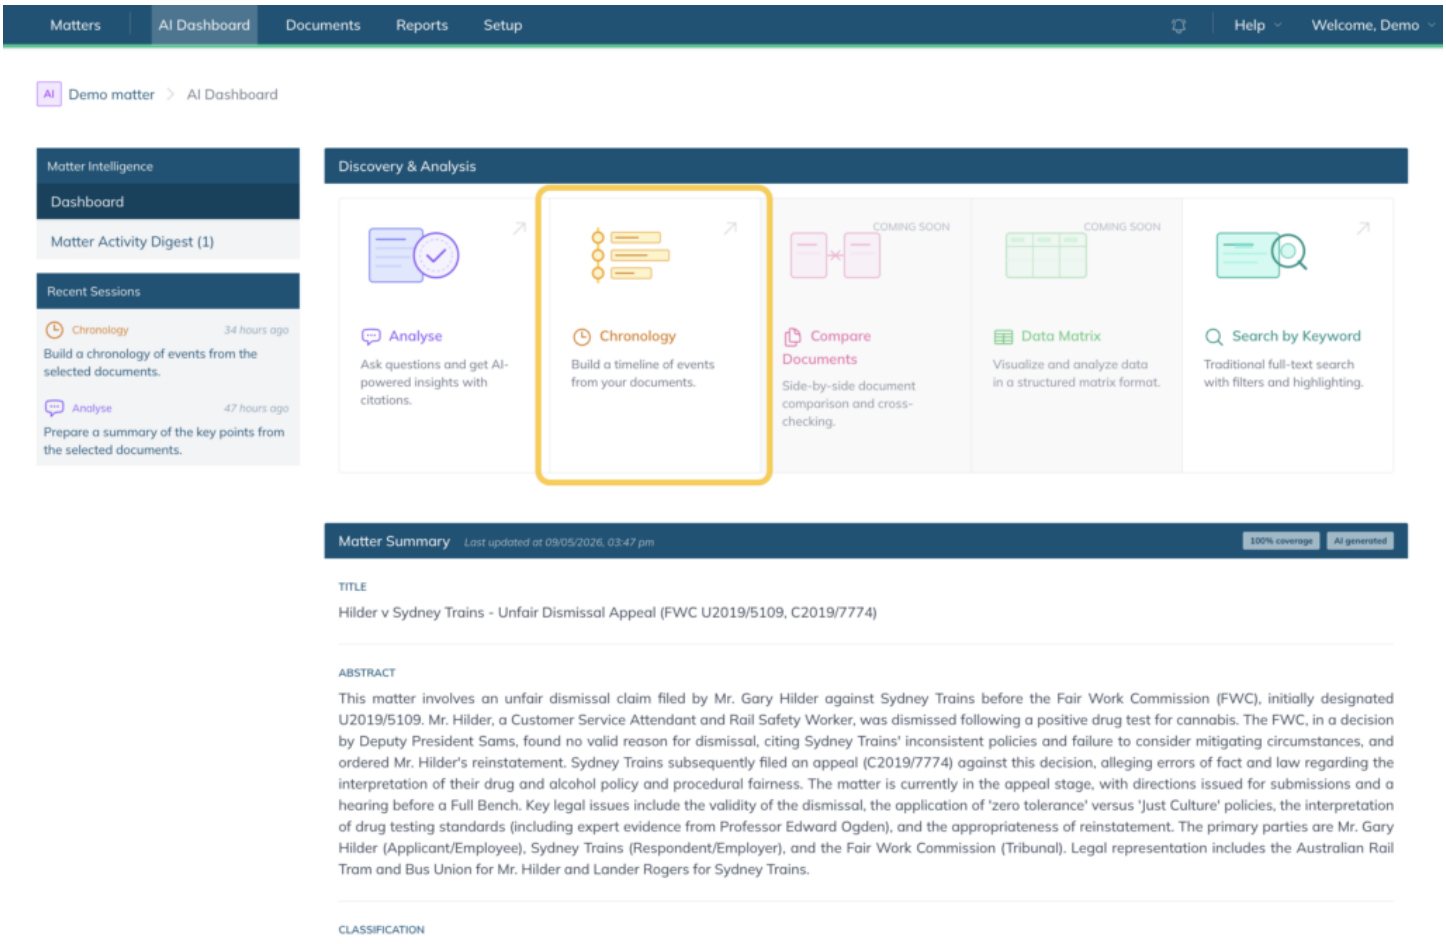
How to create a chronology

AI Matter Intelligence · https://ebriefready.legalready.ai/knowledge/how-to-create-a-chronology/

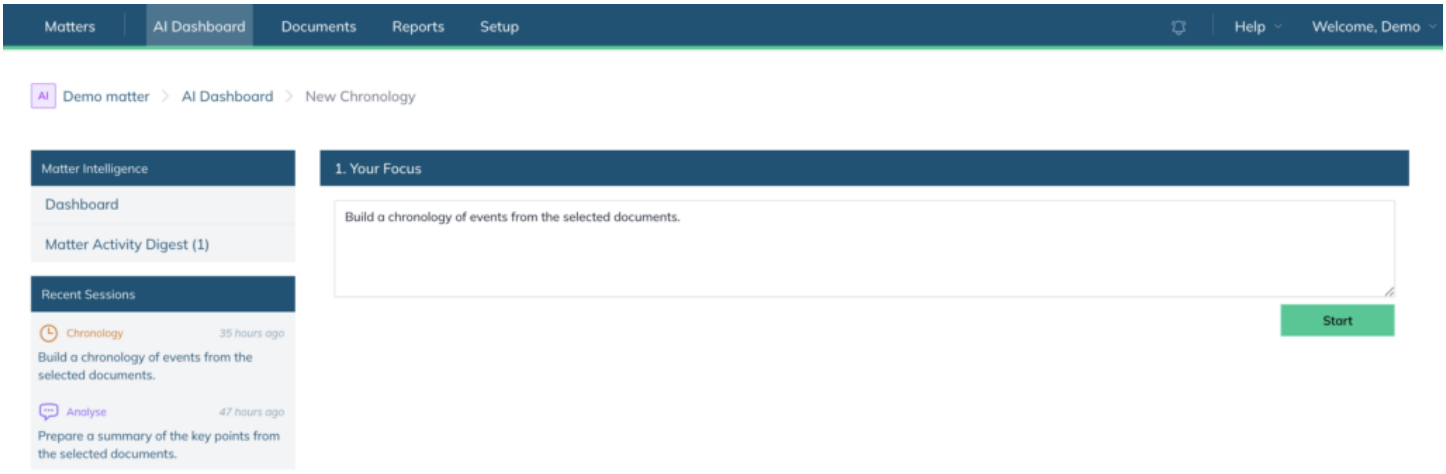
You can create a chronology from the documents within your matter with AI matter intelligence.

In the example below, we will create a chronology from all the documents within the demo matter.

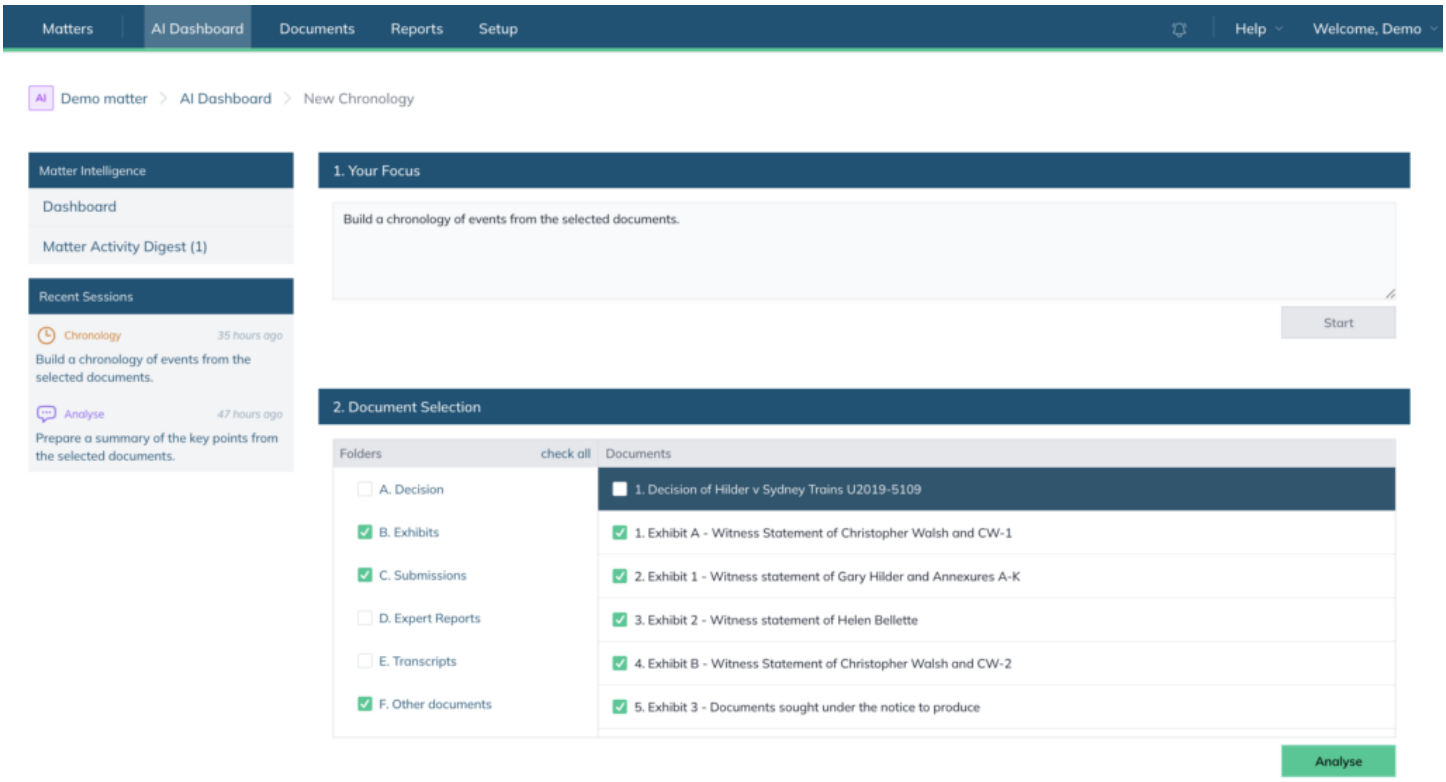
1. Go to the matter, go to "AI Dashboard", and select "Chronology":



2. Enter your prompt or question and select "Start":



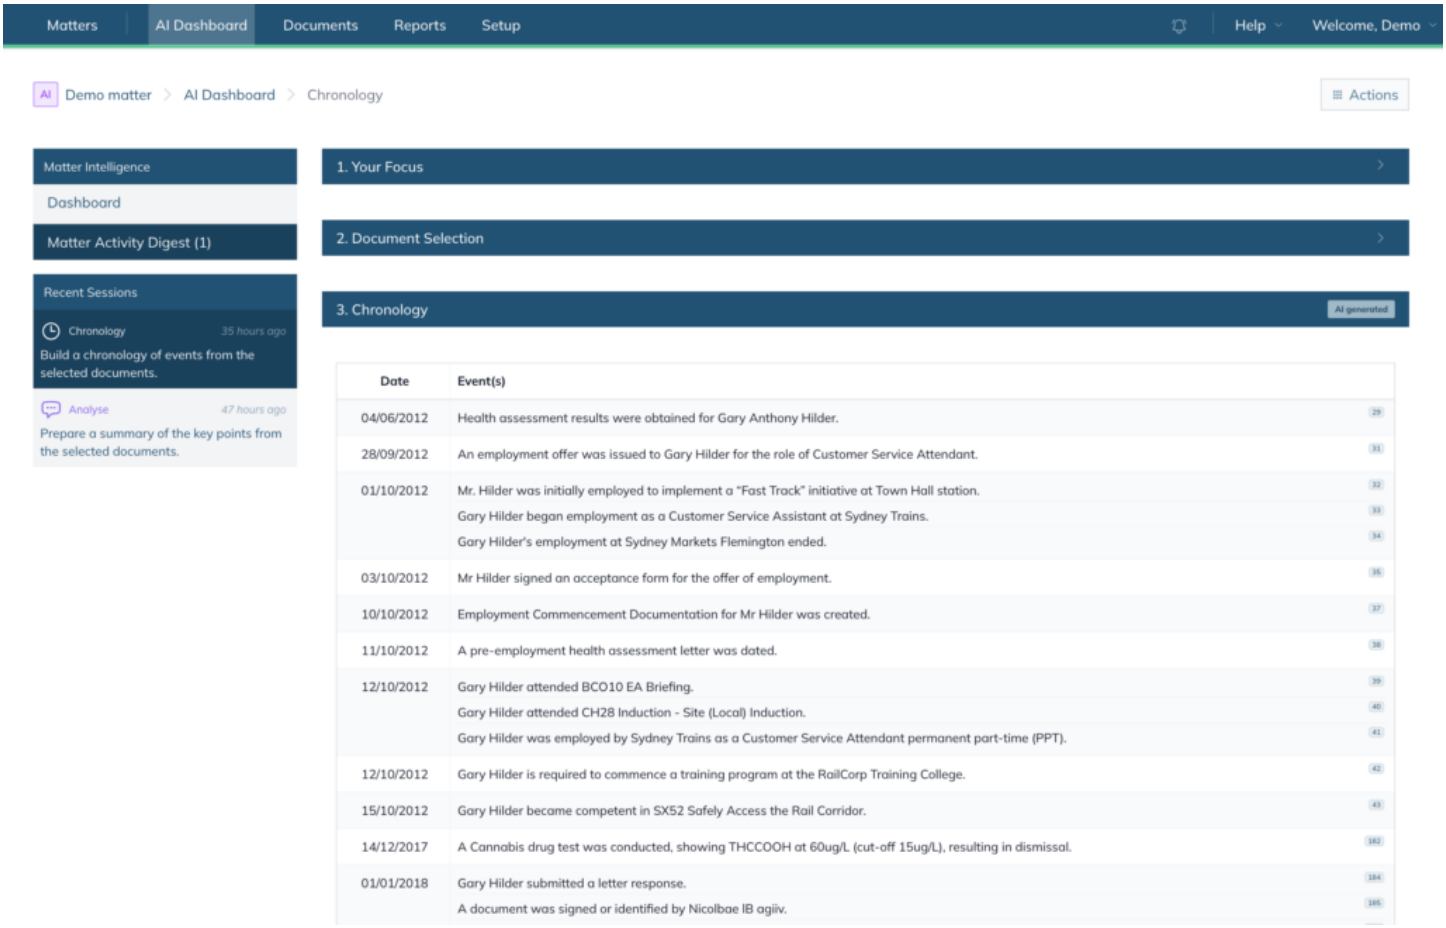
3. Select the relevant documents and click "Analyse":



Once the document(s) have been processed, the response will be displayed and saved in the "Recent Sessions" section.

You can also export the results for offline use by selecting "Actions" in the top-right corner, then choosing either the "CSV" or "DOCX" export format.

Note: If the document(s) are being processed for the first time, the system will take slightly longer to produce a response.



Note: You can also make questions to your documents through our analysis feature, read how in this help article.
